Stories of our Future

*Create a self-sustaining and inspiring
sustainability hub.*

*Where collaborations are enabled by sharing knowledge and
perspectives about the future of our campus city through the personal
drives and stories of people on campus.*

Mission of Expo

1

Create a network of collaborators who continuously provide input for the expo

2

Create a diverse collection of projects (physical and digital) related to one or more of the SDG's

3

Educate students on the strategy, development and initiatives of the Sustainability Core Team

*Sustainable Development Goals

1. Network

Researchers, employees, professors, students, PhD'ers, student teams etc. who actively engage in integrating sustainability in their curriculum, services or practices. They address one or more of the SDG's in their (course)project, research, courses or initiative.

Where does sustainability fit into curriculum?

SDG's

The importance of sustainability cannot be overestimated and students, employees and the Executive Board all agree that universities have a role to play. Currently, only five percent of the courses at TU/e are related to sustainability, and that has to change. The revision of the Bachelor College offers an opportunity to integrate sustainability into the curriculum. Where do we currently stand?

Currently, only five percent of the courses at TU/e are related to sustainability, and that has to change. The revision of the Bachelor College offers an opportunity to integrate sustainability into the curriculum. Where do we currently stand?

2. Collection

Physical: Exhibit a continuously changing, diverse collection of experienceable(!) projects. (Projects will be exhibited ~4 weeks in the expo).*

*Digital: Create an online library** of past presented projects to serve as an inspiration catalogue of project and course topics (mainly focus on students).*

*can vary depending on the agreements made with the participant

**Examples: <https://projects.id.tue.nl/id/projects/search> or <https://www.rethinkingplastic.eu/gallery.html>

The image displays a grid of six project cards, each featuring a small image, the project title, and the student's name. The projects are:

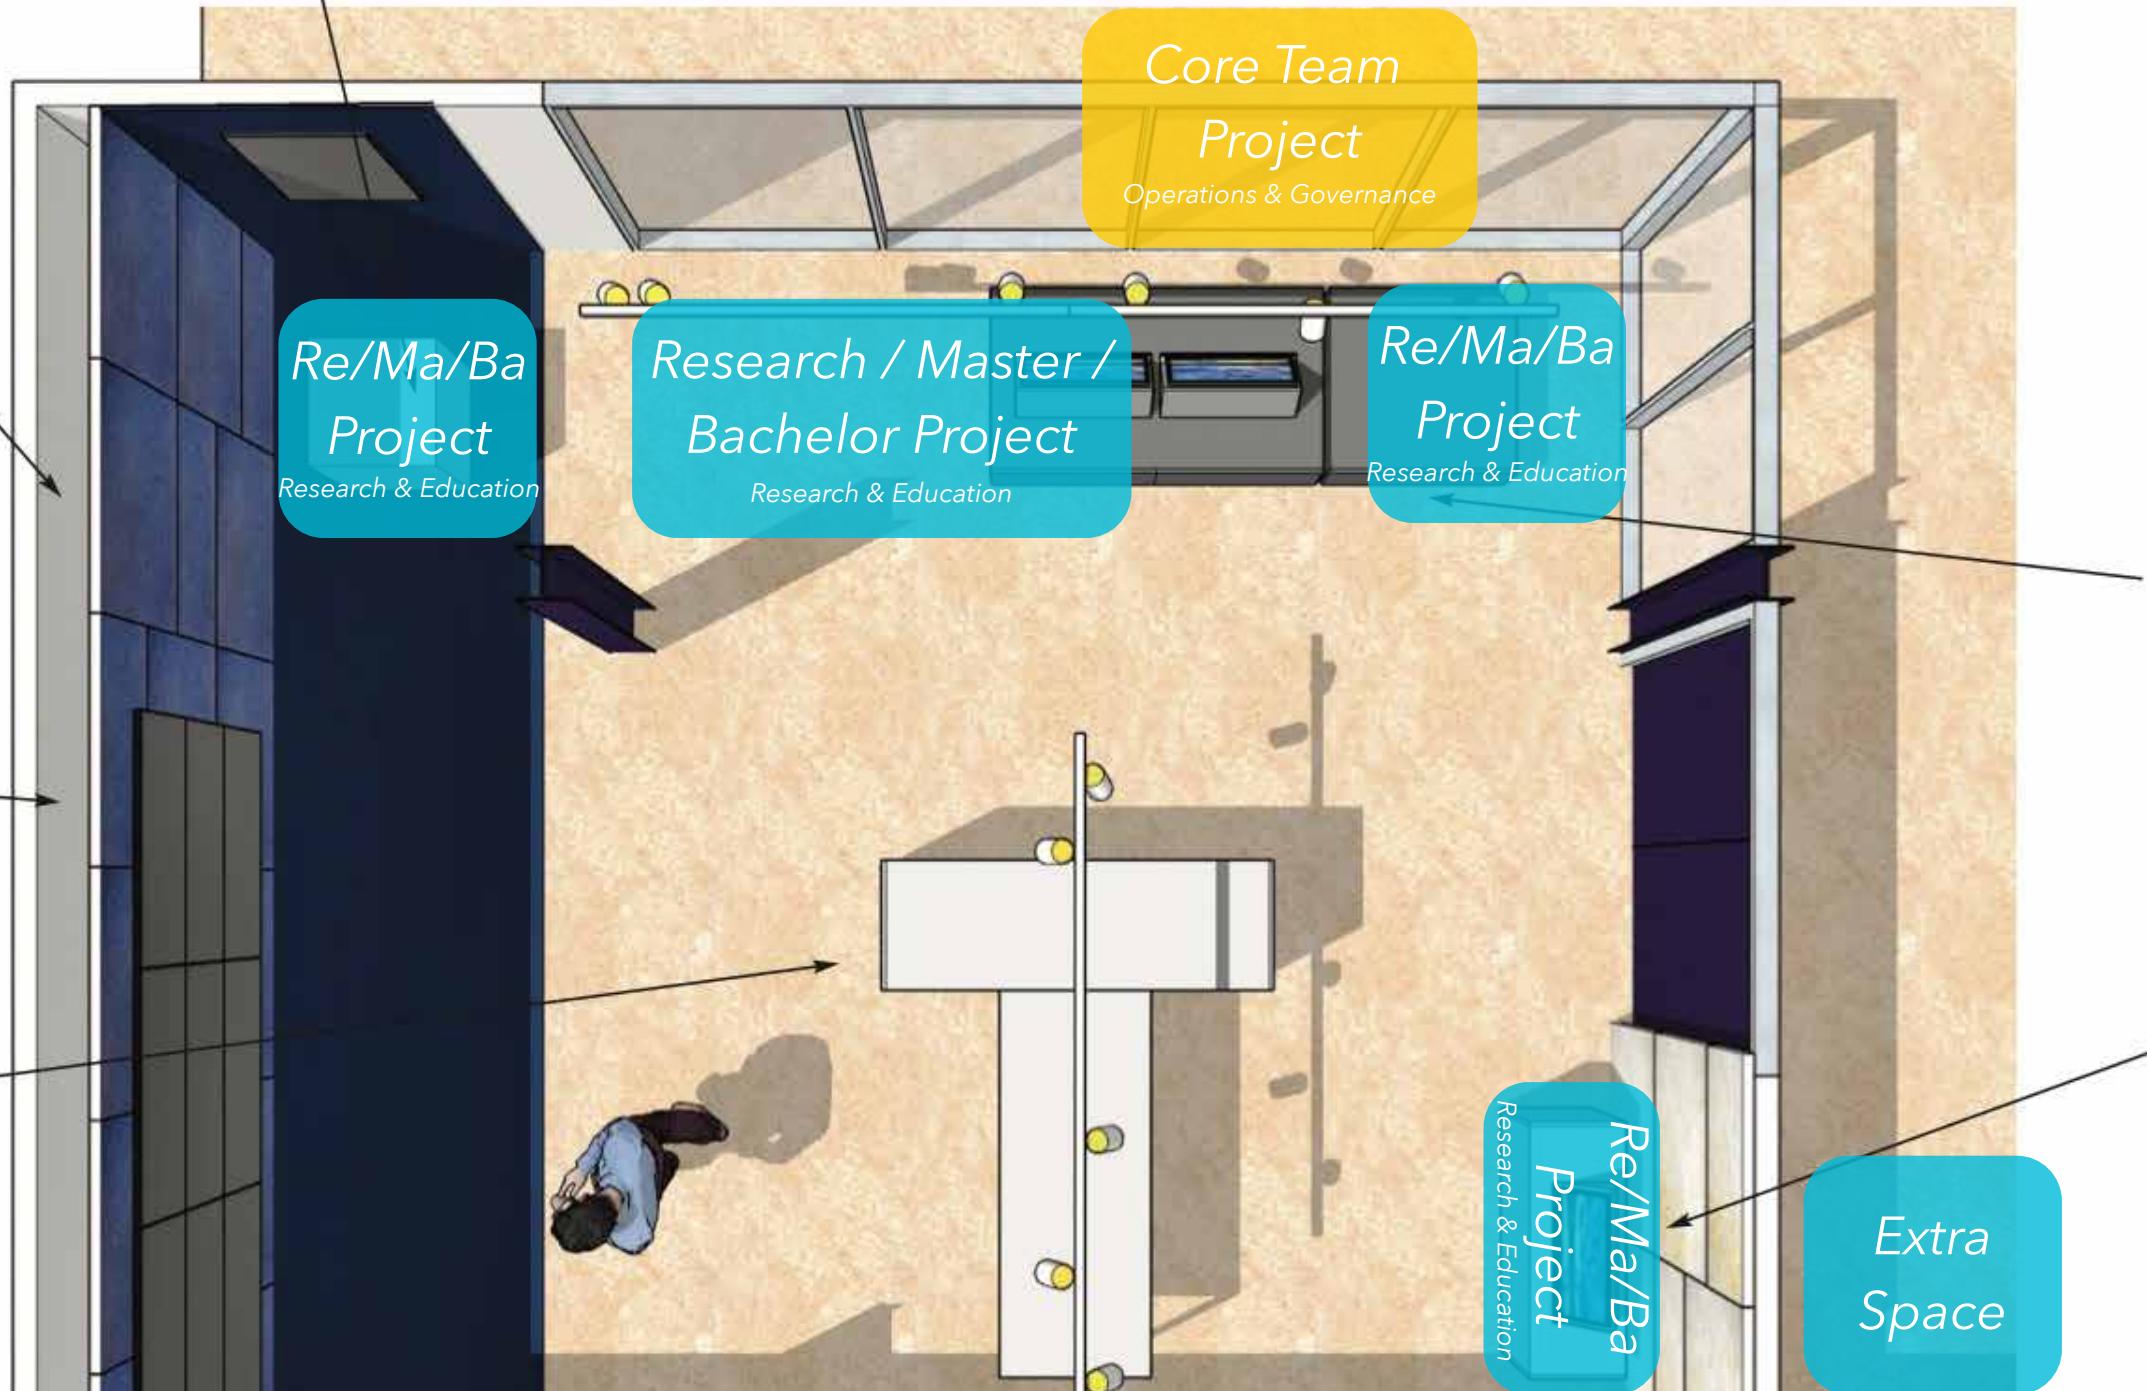

- SAMSAM**
FINAL MASTER PROJECT (FMP)
A close-up image of colorful, abstract shapes.
- Marije Baars**
A hand interacting with a control panel with buttons and a display.
- Tessa Aarts**
A hand interacting with a control panel with buttons and a display.
- GENERATING EXPLICIT FUTURES**
FINAL MASTER PROJECT (FMP)
A collection of various materials and tools on a dark surface.
- Dimitra Chantzopoulou**
A hand interacting with a control panel with buttons and a display.
- AI-KIT**
FINAL MASTER PROJECT (FMP)
A close-up image of a device with a screen and buttons.
- SEDES**
FINAL MASTER PROJECT (FMP)
A close-up image of a device with a screen and buttons.
- FACILITATING FORMA**
FINAL MASTER PROJECT (FMP)
A close-up image of a device with a screen and buttons.

3. Core Team

Make the strategy and initiatives of the Sustainability Core Team tangible / experienceable such that its structure becomes more intuitive / understandable for those in- and outside of the Green Community.

Opportunity for obtaining direct input from target audience.
